Abs Jour : Ref Zhur - Biol., No. 10, 1958, No 46749

Author : Iagnov, Z.; Cotaescu, I.; Cotaescu, E.

Inst : The Medical Section of the Academy of Sciences People's Republic of Rumania.

title : Some Experimental Data on the Role of the Nervous System in Shock.

Orig Pub : Studii si cercetari stint. Acad. RPR. Baza Timisoara. Ser. stinte med., 1956, 3, No. 1-2, 311-140 [sic]

Abstract : As a result of tests performed on 48 dogs who were in the state of shock of various etiological origins, the authors came to the conclusion that in the presence of shock inhibitions of the cortical and irritations of the subcortical centers may be observed.

TITLE: Self-hardening sodium silicate-based molding mixture

SOURCE: Metalurgia, no. 5, 1965, 244-248

TOPIC TAGS: metal casting, silicate

ABSTRACT: The authors report the successful use of a self-hardening mixture based on sodium silicate and ferro-silicon powder (75 percent) for the casting of steel and pig iron pieces. The composition of the mixture, especially the ratio between sodium silicate and ferro-silicon, varies in terms of the size and configuration of the parts to be cast. Bucharest, Studii si cercetari de inframicrobiologie, Vol 14, No 3, 1963; pp 349-354.

Abstract [English summary modified]: Following previous studies in which authors found increased urinary excretion of 5-hydroxyindoleacetic acid in infectious hepatitis, they now gave 500 mg. serotonin to 60 patients with infectious hepatitis, 5 with chronic hepatitis, 5 with other hepatic diseases and 20 healthy control subjects, measuring 5-HIAA in urine 4 to 28 hours after dose: values increased 50 to 150 mg. in inf. hep., other hepatoses up to 60, normal persons 10 to 50. This is proposed as functional and prognostic test. Structural formulae, graph; 4 Rumanian and 4 Western references.

ricketsial, Adenovirotic and Grippal Pneumopathies."

Bucharest, Studii si Cercetari de Inframicrobiologie, Vol 17,
No 2, 66, pp 93-103.

Abstract: Statistical analysis of laboratory data showed that
in the acute stages of all the above diseases the albumins are
lowered and globulins are raised, and the albumin/globulin
ratio is less than unity. During convalescence the proteinogram
returns to normal alongside the increase of specific antibodies
in the case of grippal or adenovirus infections, but in the case
of rickettsial or pararickettsial ones does so only when the
specific antibodies are countered by treatment.

Includes 4 Rumanian and one French reference.

TITLE: Study of urinary mucoproteins -- the Donaggio test -- in the course of acute
viral hepatitis

SOURCE: Microbiologia, parazitologia si epidemiologia, v. 10, no. 4, 1965, 361-364

TOPIC TAGS: protein, virus disease, hepatitis, urology

ABSTRACT: The authors show that the percentage of positive tests as well as the
intensity of the concentration of mucoproteins in the urin of patients suffering
from acute viral hepatitis, chronic hepatitis, obstructive jaundice and biliary
dyskinesia is higher when the disease is more serious. It is suggested that this
may also be due to pathologic changes in the kidneys during these diseases.

CONF. PUB.	: An. Univ. "C. J. Parhon". Ser. ştiinţ. natur., 1957, No. 16, 189-199	
SUMMARY	: Presented is the general range of <u>Cotinus coggygia</u> (<u>Rhus cotinus</u> L.) in the world, in Rumania and, in particular, in more detail in forests of the Bucharest region. The presence of smoke trees in the forests of Mekereu and Menafu is recorded for the first time in the literature. Due to the great economic value of this species the proposal is made to extend its range at the expense of plantations in the steppe and forest steppe zones of Rumania.--A. Iana
